WILDPOPPYDC@GMAIL.COM

WILDPOPPYCREATIVE.CO

Some helpful things to know...

If you've never set up a website, it may be helpful to know that you can expect to spend about \$20 per month for web hosting and another \$20-30/year for your domain name (URL). Obviously costs can go up from there depending on add-ons, but most small businesses who are not selling e-commerce will not need add-ons.

I also like to let clients know that it's a good idea to schedule some professional photography for your business if you haven't done so already. Good quality photos to represent you and who you are can go a long way to personalize your website! Otherwise stock photos are always a good option.
